

Accel S/S custom made spark plug wire sets

- Deliver up to 5 times more energy to the spark plugs than even the Screaming Eagle® wire sets, yet they are fully compatible with the Delphi® fuel injection systems.
- Accel's advance technology spark plug wire construction and low resistance "Ferro-Spiral"™ delivers maximum energy while not tripping the "check engine" light like most other wire sets.
- The high temperature boots and wire can withstand over 500 degrees and not miss a beat.
- These new wire sets work great on carburetor equipped engines too.
- The high temperature silicone outer layer is available in blue, black, red and yellow to suit any taste.

Dyna coil wires

DYNA Wires are available with a solid copper core for use on older vehicles where electrical interference is not an issue. For use on new vehicles with electronic advance ignitions or other sensitive electronic equipment use DYNA suppression wires with a high grade graphite core for best performance and electrical noise suppression. Both wire types ensure maximum energy transfer and a 135 degree snap boot for easy installation. Available in bags of 2 or 4 wires.
