## 80 SERIES

### 89XI DESERT GOGGLE / 87OTG SAND-DUST / 83XI DESERT

Riding in a desert environment puts extreme demands on a goggle; this is why the 89Xi Desert Goggle was created. High winds, fine soil, and sand can make the desert a virtual dustbowl, blinding riders with particulate matter. For this reason the 89Xi Desert Goggle has specialized vent foam. After formulating and testing numerous foams, Scott's design team identified one that handles the demands of the desert. With increased density and a reduction in pore size, the all new Dust-Catcher Vent Foam on the 89Xi Desert Goggle keeps the dust out and lets riders enjoy themselves. To round out the package, Scott installed our Molded Duel-Density (MDD) Face Foam and a grey-based light sensitive lens; the brighter the day, the darker the lens gets. (Compatible with all Xi Series accessories.)

<b>355-9680</b>	89Xi Desert Black	(E)	<b>\$68.99</b>
<b>355-9681</b>	83Xi Desert Black	(E)	<b>\$36.99</b>
