

## ENGINE GUARDS

### Engine Guards

From bike to bike, considerations such as floorboards, foot controls and cornering clearances are just a few of the reasons why from model to model, nothing is universal about Paladin highway bars. The thick wall 1-1/4" construction is heavily chrome plated to National Cycle's industry leading standards. In the event of a bike tip over, they may help protect the bike's finish and components. They are perfect for clamp-on highway pegs.

The engine guards protect you against superficial damage, like an inversion of the bike or stop at very low speed. The engine guards are not designed to protect the driver in the event of collision. See page 106-112 for our large choice of footrests.
