

PEACEMAKERS EXHAUST FOR METRIC CRUISERS

70-N41006 for VTX1300S

When the Diverter Valves are closed, the exhaust gases are routed through the Peacemakers' patent pending AeroBaffle, reducing the exhaust sound volume to a lower level.

When the Diverter Valves are opened, the exhaust gases flow through the straight pipe down the center of the muffler, resulting in increased exhaust sound volume and greater engine performance.

Peacemaker end caps can be easily rotated to suit your style preferences.

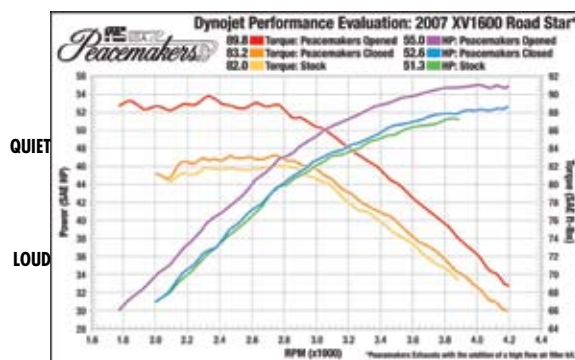

Features & benefits

- Go from quiet to loud at the flip of a switch!
- Flip the switch and the Actuator Motor pushes/pulls on a cable, opening or closing a valve in the mufflers that diverts the exhausts gasses between a baffle or a straight pipe, changing the exhaust sound volume.
- Larger 4" mufflers yield a large change in sound volume - up to 17 decibels (Road Star) change from quiet to loud.
- Same decibel level as stock in quiet mode.
- Design features interchangeable, rotatable muffler tips (comes with slash cut, other styles available).
- VTX1800 and VTX1300 versions include head-Pipe; Road Star system is slip-on muffler.
- Compatible with all other National Cycle accessories, including Cruiselineer saddlebags and Paladin Highway Hawk.
- Peacemakers for other popular metric cruisers will be developed throughout the years.

70-N41301 for Yamaha Road Star (shown with Cruiselineer Saddlebags)

Measured on a stock 2000 Yamaha XV1600 Road Star with a high flow air filter kit.

Imagine being able to start up your powerful V-twin for an early morning ride without angering the neighbors. Imagine enjoying a deep powerful exhaust note without cringing whenever you pass a police officer or school zone. The new peacemakers® Exhausts make those dreams a reality! Featuring Diverter Valve and AeroBaffle™ technology, Peacemakers® Exhausts enable riders to get the sound they need, when they need it - while they ride! Be wild and unleash the throaty rumble locked inside your v-twin cruiser, but then just flip the switch to tone it down when required.
