

FMF POWERBOMB & HI-FLO HEADER

Power Bomb Header

- A 4-stroke header system that incorporates FMF's patented Power Bomb module at a precise location in the initial stage of the header system. By positioning the "Bomb" at this key point, the expansion and contraction of exhaust sonics through the system results in a flow increase of nearly 10%
- The surface of the perforated core lets the sound exit into the absorbing material (steel wool packing) and then allows the air to expand; cool, and ramp back up at air higher pressures (RPM's).
- The Power Bomb is a "pre-muffler" of sorts, which helps to lower the bikes sound output because it provides more sound absorbing surface area to allow the exhaust gases to become absorbed

Stainless steel Hi-Flo Header

- Designed to enhance low to mid RPM power, which increases tractability.
- By maximizing exhaust and improving ergonomics, the Hi-Flo Header is a must have for the performance minded 4-stroke enthusiast
