

ATV TIRES

MUD BUG

- 30mm extra deep lugs provides traction in deep mud.
- Tread base ridges adds strength and helps clear mud.
- 6-ply rating offers greater puncture resistance which means fewer flat tires.
- Dual stage tread bars help shed mud and eliminate mud build up.
- Sweeping angled tread pushes mud away from the tire, improves traction.

MUDZILLA 25", 26", 27", 28", 30" Super Mud

Here it is, Mudzilla! The meanest, baddest, and best looking ATV tire in the industry. Mudzilla is designed for large four-wheel drive ATVs, and their owners who are looking for the ultimate in traction and who want to separate themselves from the crowd.

- Raised Outline White Letter design on the sidewall, first in the industry.
- 28 inches tall for maximum ground clearance.
- 1.5 inch tread depth for ultimate in traction.
- Unique tread, designed to offer the smoothest ride of any mud tire.
- Reinforced Carcass Ridges help shed mud.

BIGHORN 2.0 RADIAL

Bighorn 2.0

Based on the legendary Bighorn, the new Bighorn 2.0 is a lightweight version that mimics the tread design of the original, with a slimmer profile. The non-directional pattern provides predictable cornering and claws up roots and rocks, creating optimum climbing confidence. The Bighorn 2.0 boasts a 6-ply rating, offering the durability that you've grown to expect from Bighorn tires. For more information on the new Bighorn 2.0, visit your local dealer or go to Maxxis.com.

Radial Bighorn Original M917/M918

The radial construction offers a significantly smoother ride over rough trails. The extra lugs on the shoulder protect the sidewall and rim. The tire is suitable for desert, dirt, and rock application.
