EnviroTune stage 3 fuel injection control

Now available through Techclusion and Dobeck performance the Enviro-Tune Gen-3 adjustable fuel injection module. Designed and engineered by Vallen Dick owner of Enviro-Tune and tuner for the Western and National champion of the Destroyer drag race series. Enviro-Tune introduces their new Gen-3 adjustable fuel injection module. The new Enviro-Tune Gen-3 is a new load-based fuel injection module that does not require any splicing or modifications to your ATV during installation. The modules come pre-loaded with base maps for different models which can then be fine tuned for each individual's riding style and vehicles with three buttons. Tuning is so easy that laptops and dyno machines are not required to maximize your motorcycle's performance. Utilizing the latest in load-based technology in fuel injection performance, the new Enviro-Tune Gen-3 detects the exact amount of load on the engine at any RPM and any road speed and delivers the perfect amount of fuel to the engine for optimum performance. This is a superior design over fuel injection modules that work off of throttle position. As throttle positions can be the same at different speeds and with different loads on the engine like riding in the mountains, with the same amount of fuel injected into the engine in these varying conditions, performance can suffer.

Model	Year	Enviro P/N	Price
BRP/CAN-AM			
Outlander 500/650/800	2006-08	114-0020	(B) \$357.99
Renegade 500/650/800	2007-08	114-0021	(B) \$357.99
DS450	2008	114-0022	(B) \$320.99
